

### IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1-18. (Canceled)

19. (Currently amended) An isolated peptide or ~~polypeptide~~ protein according to claim 20, wherein said peptide or protein comprises a Flt4 fragment that is encoded by a polynucleotide or oligonucleotide that consists of a continuous nucleotide sequence of at least 200 nucleotides from a nucleotide sequence selected from the group consisting of: SEQ ID NO: 1 and SEQ ID NO: 3.

20. (Currently amended) An isolated peptide or ~~polypeptide~~ protein comprising the Flt4 receptor tyrosine kinase (Flt4) extracellular domain amino acid sequence set forth in SEQ ID NO: 2 or 4 or comprising a fragment ~~thereof~~ of said extracellular domain, wherein the fragment includes sufficient amino acid sequence of SEQ ID NO: 2 or 4 to generate an immune response in a nonhuman ~~mammalian~~ mammal to produce antibodies that bind to Flt4 (SEQ ID NO: 2 or 4) and fail to bind to the Flt1 receptor tyrosine kinase amino acid sequence set forth in SEQ ID NO: 6.

21. (Currently amended) A purified peptide or ~~polypeptide~~ protein according to claim 20, comprising ~~[[an]]~~ said extracellular domain (EC) fragment, fragment of SEQ ID NO: 2 or 4.

22. (Currently amended) A purified ~~polypeptide~~ peptide or protein according to claim ~~20~~ 21, wherein the fragment that includes extracellular domain amino acids 21 to 775 of SEQ ID NO: 2 or 4.

23. (Currently Amended) A purified ~~polypeptide~~ peptide or protein according to claim ~~20~~ 21, wherein the fragment that includes amino acids 1 to 775 of SEQ ID NO: 2 or 4.

24. (Currently amended) A peptide or protein comprising a deletion fragment of the ~~polypeptide~~ peptide or protein of claim ~~[[23]]~~ 22.

25. (Currently amended) An oligonucleotide or polynucleotide comprising a nucleotide sequence that encodes the peptide or ~~polypeptide~~ protein of any one of claims 19-24.

Application No.: 09/765,534

Docket No.: 28967/34891A

26. (Currently amended) An oligonucleotide or polynucleotide according to claim 25, further comprising an expression control sequence operatively linked to the sequence ~~[[the]]~~ that encodes the peptide or polypeptide.

27. (Previously presented) An expression vector comprising an expression control sequence operatively linked to the oligonucleotide or polynucleotide according to claim 25.

28. (Previously presented) An expression vector according to claim 27, wherein the expression control sequence comprises a promoter that promotes expression in a mammalian cell.

29. (Previously presented) A host cell transformed or transfected with a vector according to claim 28.

30. (Previously presented) An oligonucleotide or polynucleotide comprising a nucleotide sequence complementary to the oligonucleotide or polynucleotide of claim 25.

31. (New) A purified peptide or protein according to claim 20 that comprises an extracellular domain fragment that comprises at least one immunoglobulin-like domain of the Flt4 extracellular domain.

32. (New) A purified peptide or protein comprising Flt4 receptor extracellular domain amino acids 21-775 of SEQ ID NO: 4.

33. (New) A purified peptide or protein comprising a member selected from the group consisting of:

(a) Flt4 receptor extracellular domain amino acids 21-775 of SEQ ID NO: 4;

and

(b) Flt4 receptor tyrosine kinase peptides obtained by cyanogen bromide cleavage of Flt4 receptor tyrosine kinase, wherein the peptides include Flt4 extracellular domain amino acids.
